# Introduction

---

## PregAngel

---

An application for mothers-to-be to assist and guide them throughout their pregnancy journey.

---

# Problem Statement

---

Amidst this pandemic situation, the weekly diagnostic tests, scans and investigations are not being done regularly. Pregnant women are doubtful and concerned about their actions, the safety of themselves and the fetus. The absence of an information exchange system or a live tracking facility for the mother's health can lead to more fear, stress and anxiety, or possibly even fatalities.

---

## THE SOLUTION

*PregAngel is an app to provide readily available medical assistance and support for all the apprehensions a mother might have. With health tracking, emergency alert, patient database logging, and daily tips and sessions, PregAngel will be a constant companion for your pre- and post-natal needs.*
